

Tungsten Carbide Multiedge Bottom Knives

TURMOND

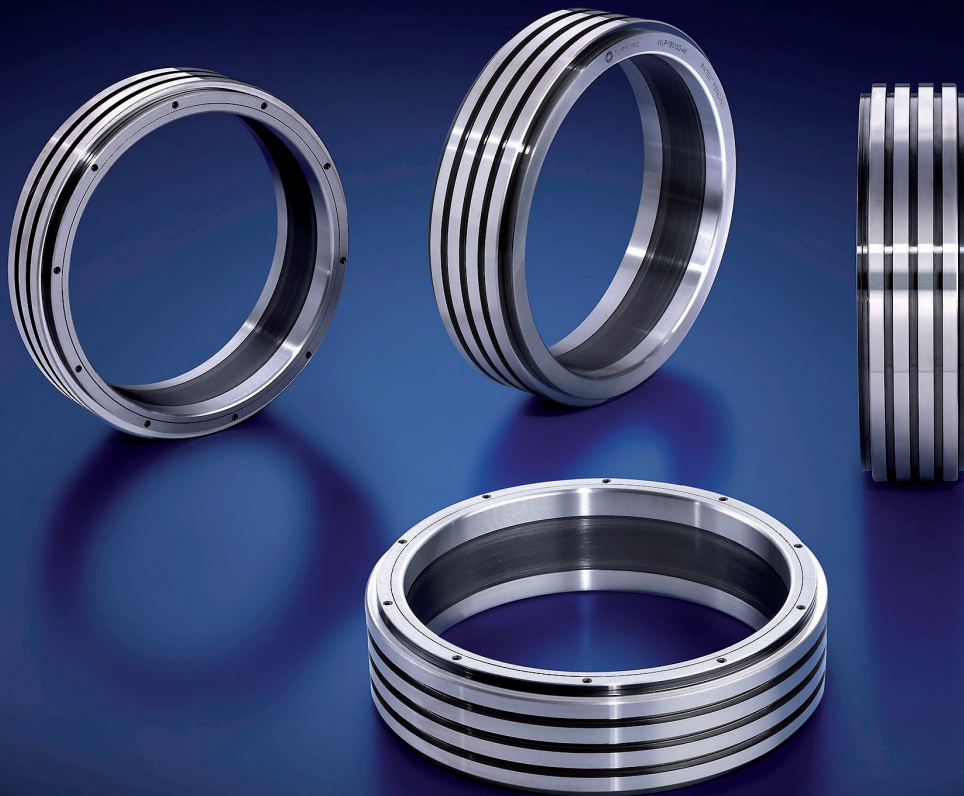

exceeding carbide technology

Turmond introduced in the converting industry world a completely new and revolutionary concept of bottom knives made out of tungsten carbide which are representing the future technology in this field.

- Lifetime compared to conventional steel bottom knives is from 20X to 50X: **Turmond** bottom knives can produce on a machine for more than 1 year without being reconditioned.
- Impressive improvement on cut accuracy due to the fact that the carbide bottom knife is keeping sharpened the steel dished knives.
- Incredibly low roughness (Ra 0.005) on turmond bottom knives surface is totally avoiding the glue sticking on the blades .

Tungsten carbide multiedge bottom knives, converting the future.
